HOW TO

VIM's basics

VIM's modes

normal mode – navigate the structure of the file

insert mode – editing the file

Visual mode – highlight portions of the file to manipulate at once

a file = text objects

Text objects

w – words
s – sentences
p – paragraphs

Motions

```
a - all  
i - in  
t - 'til
```

Commands

```
d - delete  
c - change  
y - yank (copy)  
v - visually select
```

So what?!

dw
